\* Li-Ion: available from 1 July 2017

All measurements including sideshift mast or sideshift forks (carriage)

- <sup>1</sup> Values decrease by 72 mm per battery size for larger batteries. Applies to the FM-X, FM-X W and FM-X EW;
- Values decrease by 90 mm per battery size for larger batteries. Applies to the FM-X N
- <sup>2</sup> Aisle width for pallet 1000 x 1200 crosswise:
  - Values increase by 56 mm per battery size for larger batteries. Applies to the FM-X, FM-X W and FM-X EW;
  - Values increase by 74 mm per battery size for larger batteries. Applies to the FM-X N
- Aisle width for pallet 800 x 1200 lengthwise:
  - Values increase by 66 mm per battery size for larger batteries. Applies to the FM-X, FM-X W and FM-X EW;
  - Values increase by 85 mm per battery size using larger batteries. Applies to the FM-X N
- <sup>3</sup> May vary according to the mast, with sideshift/fork tilt 2°/4°
- <sup>4</sup> With the option cabin/wind protection, height h<sub>6</sub> is 2180 mm
- <sup>5</sup> With optional cabin, length will be extended by 150 mm
- <sup>6</sup> Increases in steps of 72 mm for each larger battery size for FM-X, FM-X W, FM-X EW models
- Increases in steps of 90 mm for each larger battery size for FM-X N model

\* Li-Ion: available from 1 July 2017

All measurements including sideshift mast or sideshift forks (carriage)

<sup>1</sup> Values decrease by 72 mm per battery size for larger batteries. Applies to the FM-X, FM-X W and FM-X EW;  
Values decrease by 90 mm per battery size for larger batteries. Applies to the FM-X N

<sup>2</sup> Aisle width for pallet 1000 x 1200 crosswise:

- Values increase by 56 mm per battery size for larger batteries. Applies to the FM-X, FM-X W and FM-X EW;  
- Values increase by 74 mm per battery size for larger batteries. Applies to the FM-X N

Aisle width for pallet 800 x 1200 lengthwise:

- Values increase by 66 mm per battery size for larger batteries. Applies to the FM-X, FM-X W and FM-X EW;  
- Values increase by 85 mm per battery size using larger batteries. Applies to the FM-X N

<sup>3</sup> May vary according to the mast, with sideshift/fork tilt 2°/4°

<sup>4</sup> With the option cabin/wind protection, height h<sub>6</sub> is 2180 mm

<sup>5</sup> With optional cabin, length will be extended by 150 mm

<sup>6</sup> Increases in steps of 72 mm for each larger battery size for FM-X, FM-X W, FM-X EW models

Increases in steps of 90 mm for each larger battery size for FM-X N model

FM-X Driver Seated Reach Truck  
Top-level precision

This specification sheet, which conforms to VDI guideline 2198, provides the technical values for the standard equipment only. Different tyres, other masts, the use of accessories, etc., may result in other values.

All measurements including sideshift mast or sideshift forks (carriage)

<sup>1</sup> Values decrease by 72 mm per battery size for larger batteries. Applies to the FM-X, FM-X W and FM-X EW;  
Values decrease by 90 mm per battery size for larger batteries. Applies to the FM-X N

<sup>2</sup> Aisle width for pallet 1000 x 1200 crosswise:  
- Values increase by 56 mm per battery size for larger batteries. Applies to the FM-X, FM-X W and FM-X EW;  
- Values increase by 74 mm per battery size for larger batteries. Applies to the FM-X N

Aisle width for pallet 800 x 1200 lengthwise:  
- Values increase by 66 mm per battery size for larger batteries. Applies to the FM-X, FM-X W and FM-X EW;  
- Values increase by 85 mm per battery size using larger batteries. Applies to the FM-X N

<sup>3</sup> May vary according to the mast, with sideshift/fork tilt 2°/4°

<sup>4</sup> With the option cabin/wind protection, height h<sub>6</sub> is 2180 mm

<sup>5</sup> With optional cabin, length will be extended by 150 mm

<sup>6</sup> Increases in steps of 72 mm for each larger battery size for FM-X, FM-X W, FM-X EW models

Increases in steps of 90 mm for each larger battery size for FM-X N model

Masts with heights of up to 2450 mm and hydraulic mast side shift have a tilt angle of 1° forward and 3° backward.  
Masts with hydraulic side shift have a fork tilt angle of 2° forward and 4° backward or optionally 3° forward and 3° backward.

Masts with heights of up to 2450 mm and hydraulic mast side shift have a tilt angle of 1° forward and 3° backward.  
Masts with hydraulic side shift have a fork tilt angle of 2° forward and 4° backward or optionally 3° forward and 3° backward.

FM-X Driver Seated Reach Truck  
Detailed Photos

Great view of goods thanks to unique sideshift mast

Individually adjustable driver workspace

Ergonomic and sensitive control thanks to Joystick 4Plus

Easy to operate all functions without grasping thanks to fingertip operation

Ergonomically optimal position thanks to proportional seat and footplate adjustment

Relaxed view upwards and beyond goods, thanks to unique comfortable reclining seat

## FM-X Driver Seated Reach Truck

### Top-level precision

---

#### 13 metre lift height with high residual load capacity

#### Active Load Stabilisation (ALS)

#### Holistic ergonomics concept

The FM-X is always more than just a fork ahead of the rest. Thanks to Active Load Stabilisation (ALS) you can deal with the next goods transport while others would still be waiting for the mast to stop vibrating. An automatic equalising pulse provides a fast and effective way of stopping the vibrations from occurring at great heights, reducing the waiting time at the shelf by up to 80 per cent. The result is a significant increase in turnaround speed. Furthermore, the available storage space can be used more efficiently with the FM-X than ever before; the high residual load capacity means that the reach truck can lift loads of up to 1,000 kg to an incredible height of 13 metres.

Relaxed, comfortable and safe work throughout the whole shift guaranteed by the holistic ergonomics concept. Footplate, steering wheel, seat – all these components can be individually adjusted to match the work requirement at hand as well as the stature and preferences of the driver. The FM-X is a compact and efficient energy bundle convincing with top availability thanks to Li-Ion technology. This does not only allow opportunity charging at any time – it is also fast: 50% of the battery is chargeable in only 30 minutes. Many other details, such as the optional tilting seat and the exclusive STILL mast side shift, for example, make the FM-X an ideal organiser in any warehouse – from operating high racks to long distance haul or replenishment.

## Extensive Equipment

---

### Power

---

- Stable forklift mast with high residual load capacity for lift heights of up to 13 metres (1,000 kg)
- Powerful acceleration combined with high travel speeds of 14 km/h and lifting speeds of up to 0.50 m/s
- Sufficient energy for any use, thanks to battery capacities of 360 Ah to 930 Ah
- Lasting energy for multi-shift operation: high battery capacity and optional battery change over the side
- Top availability: The lithium-ion battery bundles a lot of energy and can be quickly and easily opportunity charged

### Precision

---

- High reloading performance: reduced mast vibrations, thanks to Active Load Stabilisation (ALS) for greater lifting heights
- OPTISPEED reduces mast vibrations to a minimum for medium lifting heights and enables quick goods handling
- Great view of goods without being disrupted by hydraulic lines on the fork carriage, thanks to its unique sideshift mast
- Top precision right from the first millimetre thanks to the optical lift height sensor

### Ergonomics

---

- Cushioned driver's seat to reduce impact when driving over uneven surfaces
- Seat can be adjusted to the best ergonomic position, thanks to proportional adjustment of the seat and foot plate
- Relaxed view upwards and beyond goods, thanks to unique comfortable reclining seat

- Easy to operate all functions without grasping, thanks to joystick or fingertip operation
- Easy storage and retrieval with the Easy Target lift height pre-selection system

### Compactness

---

- Suitable for even the most narrow working widths, thanks to the reach truck concept
- Thanks to its particularly narrow chassis, the FM-X N is suitable for use in block storage and one-way shelving
- The FM-X W version allows picking up industrial pallets lengthwise between the straddle arms
- The FM-X EW version allows picking up industrial and Euro pallets crosswise between the straddle arms

### Safety

---

- The large step and handle make it safe and easy to get in
- Versatile, flexible access control with FleetManager 4.x
- Extremely safe to drive round bends with curve speed control depending on steering angle

### Environmental Responsibility

---

- Long-lasting and energy-saving LED headlights
- Blue-Q efficiency module saves up to 10% energy at the press of a button with no loss of performance
- Energy recovery when braking means you can use the machinery for longer with optimum use of resources
- Low operation costs: low energy consumption and long maintenance intervals
